What is a specialty drug benefit? A specialty drug benefit requires that you pay a different amount (copayment) for specialty drugs, no matter what the status is of your drug on our PDL. If you have a specialty drug benefit, you will pay the specialty drug copayment or coinsurance under your plan for specialty drugs, whether or not you receive a generic, preferred brand or non-preferred brand drug. Refer to your benefit document to find the amounts that apply to you for specialty drugs.

What if my drug is not listed on this PDL? This is a listing of the most commonly prescribed drugs within certain categories. If your drug is not listed, it may well be that:

1. Your drug is a generic and all generics are considered preferred drugs,
2. Your drug is not a preferred drug and is available at the highest copayment or coinsurance, or
3. Your drug is preferred but is not included in this brochure. For an alphabetical listing of commonly prescribed generic and preferred brand-name drugs, visit our website. Or, call Caremark toll free at 888-903-7290. Caremark is an independent company that administers prescription drug benefits on behalf of your health plan.

There are a few drugs for which your doctor may need to request prior authorization from us before you can fill the prescription. This is to make sure your benefit plan covers the drugs. Visit our website for more details.

Your drug is available over the counter or is excluded from coverage. For many conditions, an over-the-counter (OTC) medication may be the most appropriate treatment. Talk to your doctor about over-the-counter alternatives. They may be a good choice for you and may cost you less.

Keep in mind this list is subject to change. Your benefit document defines your actual benefit and may exclude coverage for certain drugs listed in this booklet. Some drugs have quantity limits on them. This means you only can receive a limited amount at one time or during a specific time period. Your pharmacist can tell you if your benefit plan applies any limitations to your prescriptions. Pharmacy law requires a valid prescription for the purchase of needles and syringes in certain states. If covered in the pharmacy benefit, OTC products require a valid prescription.

The PDL is subject to change at any time during the year without prior notification to members or physicians.
